ARNAB MONDAL

arnabjuniormondal123@gmail.com | +91-9836029568 | https://www.linkedin.com/in/4rn4b

Cloud & DevOps Enthusiast | MLOps Practitioner | Building Scalable & Intelligent Systems

Skills

Python | Streamlit | AI Agents | RAG | GenAI | AWS | Docker | Jenkins | SQL/MySQL | Git | GitHub | Java | HTML5 | CSS3 | MongoDB | Blockchain | JavaScript | Node.js | Express.js | Angular | Solidity | Problem Solving |Team Work

Education

University of Calcutta, Kolkata, India **2020 - 2022**

- *Master of Computer Application (MCA) | CGPA: **9.51***

University of Calcutta, Kolkata, India **2017 - 2020**

- *Bachelors of Computer Science (B.Sc. Honors), Aggregate: **67% (First Class)***

Work Experience

Cognizant | *Programmer Analyst* **Jan'22- Present**

- *Built AWS Lambda authorizers **to securely validate tokens and generate** IAM policies**, enabling scalable and role-based access control for API endpoints.***
- *Designed CI/CD pipelines **using** GitHub Actions **to fully automate the build, test, and deployment processes in** AWS environments**, ensuring reliable delivery of updates.***
- ***Used** Elasticsearch **and** Kibana **for effective** log monitoring**, in-depth debugging, system health checks, and overall performance optimization of applications.***
- ***Executed complex** SQL queries **for backend data operations, ensuring data integrity and correctness across the database.***
- *Improved frontend UI **in collaboration with clients, focusing on enhancing user experience and improving responsiveness of the web application.***
- ***Developed a** property search application (MEAN stack) **to facilitate efficient property lookups and structured data handling in a web environment.***
- *Optimized APIs **using** Spring Boot**, Maven**, and** Hibernate**, resulting in a 30% improvement in supplier workflow efficiency.***

Projects

IntelliDoc (AI-powered Document System) | AWS, Gemini AI, NLP, Document Intelligence

- *Designed and deployed an end-to-end intelligent document processing platform leveraging AWS services (**Amazon S3, Textract, DynamoDB, and SNS**) for secure storage, OCR, structured data extraction, and event-driven workflows.*
- *Integrated **Gemini AI and Generative AI** models to provide context-aware summarization, semantic search, and natural language Q&A capabilities over complex PDF documents.*
- *Implemented a **Retrieval-Augmented Generation (RAG**) pipeline that combines extracted document embeddings with **GenAI** responses, enabling accurate, reference-backed answers to user queries.*
- *Built a chat-driven interface that transforms unstructured documents into searchable, explainable AI-driven knowledge sources, enhancing accessibility and usability while maintaining process documentation.*

Organ Donation using Blockchain | React, Solidity, Metamask

- *Developed an application dedicated to organ donation post the donor's demise using **blockchain**, reducing administrative overhead by 40% through documentation and communication channels.*
- *Managed the backend using **smart contracts**, ensuring seamless data handling and management, resulting in a 60% decrease in error rates. Implemented report generation functionality, delivering comprehensive insights and analytics in Excel format.*
- *Leveraged **Solidity programming language** to construct **smart contracts**, enhancing **transparency and security** in organ donation agreements.*
- *Utilized **React for frontend development**, providing a user-friendly interface for donors and recipients to interact with the application system. This integration led to a 25% increase in user engagement.*

Certificates

- *AWS Certified Cloud Practitioner | Oct'23 to Oct'26*
- *Google Cloud Digital Leader | Mar'25 to Mar'28*
- *Microsoft Certified: Azure AI Fundamentals | Apr'2025*
